### **In November, the Sustainable Living Educational Series Returns to Hilo, Hawai`i**

The best educators in sustainability will convene in Hilo, Hawai`i to teach a series of classes on Sustainable Living. Each Thursday night in November a different class will feature a straight-forward approach to living a more sustainable lifestyle on Hawai`i Island.

- **Rainwater Harvesting** - catching your own water.
- **Alternative Power Systems** - generating your own power.
- **Organic Gardening** - growing your own food.
- **Sustainability 101** - living a more sustainable lifestyle.

Anyone interested in living a more sustainable lifestyle should attend this event. These classes will also provide a starting point for anyone interested in learning about green jobs. Green career information will be offered in each class. Anyone interested in jobs in the green economy should attend these classes. Specific information will be provided in each class to help folks prepare for a greener economy.

Daniel Morii, Director of the Sustainable Living Institute said,  
"We're really happy to work with organizations and students in all areas of sustainability. These so-called green classes are the building blocks for a renewed sense of sustainability on the Island. These courses offer long-term benefits for Hawai`i Island and the folks that attend these classes."

This series provides a pathway for folks to learn the basics of sustainability. Folks interested in green jobs should attend to learn about green jobs on Hawai`i Island. Community leaders and decision makers will learn about recent trends and opportunities for sustainable systems in their communities.

More information about the Sustainable Living Educational Series can be learned by visiting:

This series continues in Kona, Hawai`i during the month of February.

We are seeking additional sponsors for this event. Anyone interested in supporting this event should contact Brent Norris at Green Collar Technologies : 808-896-7656

#### **Event Sponsors**

Sustainable Living Institute  
Hawai`i County Department of Research and Development  
University of Hawai`i at Hilo Conference Center  
Green Collar Technologies

**The Sustainable Living Institute** is created and established to conduct research and development projects on, give support to, and produce and disseminate information and art about, ways of living on the Earth which are ecologically, socially, culturally, economically, physically and spiritually sound and can, as such, be sustained over the long run without harm to people or planet, and which add to the overall quality of life.

**The Hawai`i County Department of Research and Development** provides pro-active leadership, enhancing the quality of life, and sustainability of Hawai'i Island communities through programs related to: agriculture, energy, tourism, economic development, community development, and film.

**The University of Hawai`i at Hilo Conference Center** provides comprehensive planning and coordination services for conferences, meetings, seminars and special events. Our "one-stop," professional planning team will coordinate all your accommodations, food service, ground transportation and pre- and post-conference field excursions.

**Green Collar Technologies** is a federally recognized, non-profit 501c3 organization providing sustainable educational opportunities, research and presentation services for Hawai`i Island. For more information please visit <http://greencollartech.com> or call 808-896-7656
